## Integration

Taking time to integrate is a vital part of this program. When we are learning so many new aspects of ourselves, it is all going into the knowledge part of our brain. But that is not where we store things so that they change our lives.

We all know lots of things, and pretty much anything we could ever want to know are all available to us online. But that is not what we want anymore. Knowledge is not the answer.

Wisdom is the answer. Wisdom is using the tools to create active change in your life. To actually create a great impact in your life and others. Using the tools to quit doing the addictive behaviors. Using the tools to eat in a manor that heals your body. Creating space to eliminate the fear. These are all vital aspects of creating a practice out of these sessions.

Please take some time and look at what aspects you have done a really amazing job at integrating, and then what aspects maybe you have been pushing aside.
