## The Divine Mother Creatrix of all Life

“She who has no name.” This Divine Mother is the origin of all life. Remember and be invited to step into the ineffable mystery of her warm black womb. This silent space is the source of ALL immaculate conceptions, including your soul. (Description based of the book The Sofia Code by Kaia Ra)

In this stillness, the breath of the Divine Mother breathed the breath of life into you. In this stillness the Divine Masculine and Divine Feminine were encoded into your souls blueprint to create balance, integrity and wholeness. In her ineffable wisdom we were given free will to play out our divinity and to create whatever experiences we desire. In her loving wisdom, she never desired for us to create disease, fear, greed, death, or hate. These came from our earthly bodies. These came from separating ourselves from her divine plan for our lives. These creations are not her own, yet they are because we are one with her. We are all from this one source of Divine warm black womb of all creation. Every seed, soul, solar system and being was birthed through this same no-thing.

The Divine Feminine is not separate from us, just as the Divine Mother is not separate from us. Wherever we go there she goes to. Allow for the longing to be reconnected with the Divine Mother to heal our inner child, that has been lost and separated from her for millennia. It is time to step back into her ever folding arms of grace and love. To step back into our wholeness and balance the duality within us.

Knowing the traits of the Divine Feminine are extremely helpful so we can also know the shadow aspects of these as well.
